HCI project– Phase 3

Section: 6w9 - Group number: 1

Topic: Graduate Recruitment Application

Project's Name : Mumahed

Student name	Student ID
Lujain Alahmari	
Remas Alqahtani	
Renad Alduayji	
Reuof Jubran	
Dai khalid	
Lina Alsarhan	

Fresh graduate with no CV

- The user is a fresh graduate using the system for the first time without having a prepared CV. Most tasks were completed successfully without major issues, such as account creation, login, job browsing, filtering, viewing job details, checking application status, and using the AI advisor. The system was generally easy to use and tasks were completed quickly.
- However, the user faced difficulties when creating a CV due to lack of experience with CV structure, which made the task take longer and caused minor errors. There was also uncertainty when uploading the CV, as the user was not confident about its quality. In addition, during the job application task, the user hesitated before applying because of low confidence in their qualifications and CV strength.
- Overall, the system is usable and efficient, but needs better guidance and feedback in CV creation and application steps to improve user confidence.

Task Name	Task Time	Number of Errors	Comments	Suggestion to improve Task Design
1. Create a new account	2 min	0	Done successfully with no issues	None
2. Log in	1 min	0	Done successfully with no issues	None
3. Create a CV	4 min	1	Took longer because the user is unfamiliar with CV structure	Add real-time feedback while filling sections (e.g., completeness indicator or progress bar per section)
4. Upload CV	2 min	1	User was unsure if the uploaded CV is strong enough	Show a CV evaluation score after upload (strength/weakness summary)
5. Browse jobs	3 min	0	Done successfully with no issues	None
6. Filter jobs	1 min	0	Done successfully with no issues	None
7. View job details	2 min	0	Done successfully with no issues	None
8. Apply for a job	3 min	1	User lacked confidence before applying due to a weak CV.	Add a match percentage between user profile and job before applying
9. Check application status	2 min	0	Done successfully with no issues	None
10. Use AI Advisor	3 min	0	Done successfully with no issues	None

Graduated with CV

- **The user is graduated with CV and has completed most tasks successfully without any major issues. However, a bit of problem when he was doing the "Filter jobs" task due to limited filtering capabilities, which caused slight inflexibility. system was really easy to use; user was able to finish all the tasks quickly without any big problems.**

Task Name	Task Time	Number of Errors	Comments	Suggestion to improve Task Design
1. Create a new account	0	0	User did not need it	None
2. Log in	1 min	0	Done successfully with no issues	None
3. Create a CV	0	0	User did not need it	None
4. Upload CV	2 min	0	Done successfully with no issues	None
5. Browse jobs	3 min	0	Done successfully with no issues	None
6. Filter jobs	4 min	1	Limited filtering flexibility	Allow multi-selection filtering
7. View job details	1 min	0	Done successfully with no issues	None
8. Apply for a job	3 min	0	Done successfully with no issues	None
9. Check application status	2 min	0	Done successfully with no issues	None
10. Use AI Advisor	3 min	0	Done successfully with no issues	None

Graduate exploring opportunities

- The user is a fresh graduate who already has an account and is exploring the platform to find the most suitable job opportunities. The goal was to test the efficiency of the search and filtering system, as well as the AI-driven features. The user completed all tasks successfully, noting that the interface is very user-friendly.
- However, during the filtering process, the user suggested adding more specific sub-categories to the "Major" filter to make the results even more precise. In the AI advisor task, the user was impressed by the relevance of the recommendations. Overall, the system proved to be highly efficient and intuitive for career exploration.

Task Name	Task Time	Number of Errors	Comments	Suggestion to improve Task Design
1. Create a new account	0	0	User did not need it	None
2. Log in	1 min	0	Done successfully with no issues	None
3. Create a CV	0	0	User did not need it	None
4. Upload CV	0	0	User did not need it	None
5. Browse jobs	2 min	0	Done successfully with no issues	None
6. Filter jobs	2 min	1	User tried to select multiple filters simultaneously	Allow multi-selection filtering
7. View job details	1 min	0	Done successfully with no issues	None
8. Apply for a job	2 min	0	Done successfully with no issues	None
9. Check application status	1 min	0	Done successfully with no issues	None
10. Use AI Advisor	3 min	0	Done successfully with no issues	None

HR posting a new job for the first time

- The user is an HR employee using the system for the first time to post a job. Most tasks were completed successfully, and the system was easy to navigate.
- However, the user faced some difficulty when adding job details due to unclear fields, which caused minor errors.
- Overall, the system is usable, but it needs clearer form guidance and better visibility of actions.

Task Name	Task Time	Number of Errors	Comments	Suggestion to improve Task Design
1.Sing up	1 min	0	The registration process was simple and clear	Improved visual design slightly
2.Log in	30 sec	0	Login was quick and easy	Add “remember me” option
3.Post job vacancy	1-2 min	1	Some fields were not clear	Add clearer labels
4.Add job details	2 min	1	Required fields were confusing	Provide examples or hints
5. View posted jobs	30 sec	0	Jobs were easy to access	Improved layout spacing
6.View applicants	0	0	User did not need it	None
7.View applicant profile	0	0	User did not need it	None
8.Review CV	0	0	User did not need it	None
9.Accept/Reject applicants	0	0	User did not need it	None

HR reviewing applicants for an existing job

- The HR user completed all tasks smoothly and without major issues.

The system was easy to navigate, and reviewing applicants was straightforward.
However, the HR faced a small difficulty when trying to compare applicants because the system did not provide a clear comparison view, causing slight inconvenience.
Overall, the system was simple and efficient, allowing the HR to finish all tasks quickly.

Task Name	Task Time	Number of Errors	Comments	Suggestion to improve Task Design
1.Sing up	0	0	User did not need it	None
2.Log in	1 min	0	Done successfully with no issues	None
3.Post job vacancy	0	0	User did not need it (existing job)	None
4.Add jpb details	0	0	User did not need it (existing job)	None
5. View posted jobs	2 min	0	Easy to accessand navigate	None
6.View applicants	2 min	0	Clear list, easy to browse	None
7.View applicant profile	3 min	0	Profile information was clear and well-structured	None
8.Review CV	3 min	0	CV opened smoothly with no issues	None
9.Accept/Reject applicants	3 min	0	Notes section was simple and easy to use	None

The Graduate Job Portal is pretty easy to use. People who tried it were able to do the things they needed to do without too much trouble. The system is good at the things like creating an account logging in looking for jobs uploading a CV and applying for jobs.

There were some problems. Some people had a time using the more advanced features like filtering jobs making a CV and comparing people who applied for jobs. This was because the system did not give them help the buttons and things were not clear and they did not get enough feedback. The people who used the system for the time were not sure what to do when they were making or looking at their CVs and when they were deciding which jobs to apply for. This was because they did not have confidence.

With these problems people were still able to do most things quickly. This means the system is generally easy to use. If the system gave help was clearer and made things easier to find it would be even better.

Usable or Not?

The Graduate Job Portal is usable. Most people who tried it were able to do than 70% of the things they were asked to do. This includes things like signing up logging in looking for jobs uploading a CV applying for jobs and checking the status of their applications.

Some people had a trouble with some things like filtering jobs doing things with their CVs and comparing people who applied for jobs.. This did not stop them from doing what they needed to do. It just made it a little harder. Made them less confident.

So the Graduate Job Portal meets the requirements for being easy to use.. It still needs some changes to make it more efficient, clearer and to make people more confident.

Enhancements

To make the system better for users here are some things that can be done:

- Make the menus and buttons clearer by using labels and organizing them in a better way.
- Make it easier to filter jobs by letting people choose than one thing and by adding more detailed categories.
- Make it easier to create a CV by adding step-by-step help showing progress and giving examples.
- Give people feedback on how good their CV's
- Tell people how well they match a job before they apply.
- Make it clearer when the system is suggesting things and when the status of an application changes.
- Let HR users compare people who applied for jobs easily.

These changes will make the system easier to use reduce confusion and make it better for both graduates and HR users. The Graduate Job Portal will be more intuitive. Will help people more. The Graduate Job Portal will be better, at helping graduates and HR users
